Our Profile

Manas Infotech was formed with a strong focus on Custom IT solutions and core principal of hardwork and always learning philosophy. With a strong team of skilled and experienced IT professionals and functional expertise we give our customers what they really need - a perfect solution. We understand the critical nature of client's business and provide best solutions.

As a company, young at heart with a vision to provide custom and flexible software solutions using the best talented workforce from the IT industry. Our clients find our business model scalable, adaptable and economic to suit their requirements. We boast of a unique clientele, which consists of customers ranging from Fortune 500's to startup companies and we have been able to serve both with the same zeal because of our core principles and ability to adapt our services to provide tailor-made products to suit our client needs.

Clients are our assets and employees are our strengths. We have made several alliances to provide best services and help client's business grow and maximize profits.

Manas Infotech was founded in Mumbai,India in 2009 with core principles of hard work and always learning philosophy. Started with 1 employee company and no alliances, now Manas Infotech has several skilled employees and alliances with several companies having expertise in several areas. Manas Infotech acts like a family to employees and responsible business support house for clients. Customer Relationship management is given a high value in Manas Infotech and thus we have clients working with us from last 2+ years constantly and providing us repetative opportunities. With varied clientele, we understand requirements of clients and provide the best solutions and value-additions to improve product.

Manas Infotech parrallely works on different areas which includes business process outsourcing, support services, implementation services etc. Manas Infotech also helps charitable non-profit organisation, which helps people in need and towards upliftment of human kind and enhancing world class education.

Our Solutions

Dealer eReturn Software

Dealer eReturn Software helps users to generate XML return file in two simple steps. Assessee need to enter sales and purchases data in our excel template and Dealer eReturn Software will validate data and generate XML file. This XML file assessee can upload on ACES website.

This software is beneficial for who is having many numbers of sales and purchases transactions in quarter. Those assessee need not to re-enter data again in any offline template or utility. You need to generate sales and purchases report from your existing software, SAP/ERP and just do little modification as per our excel template validation. This way users can save time in of re-entering data again for quarterly return.

Our Services

Dealer eFiling Service

Assessee has to provide us sales and purchases data in excel document as per our standard template. Excel template has two worksheets first is sales details and second is purchases details. We will convert it in our XML format as required by central excise department. If assessee will provide us his ACES user id and password then we will upload the XML on behalf of assessee after your written permission or we will send directly XML format file to you, so you can upload it on ACES website.

For quotation of this e-filing services we need to study data format of you excel data. So please send us any sample data so we will give you exact charges details for this service. Also give us details of count of dealers registration numbers, so we can consider bulk discounts for multiple registrations for single assessee. Please feel free to call us for any clarification on above details
